BENEFITS

- **Lightweight & Durable** - A fraction of the weight of wood, durable, and largely unaffected by climatic changes
- **Uniform Finish** - Clean release leaves a smoother and more uniform finish compared to wood
- **Eliminates Retardation** - No retardation or discoloration from wood sugar migration
- **Custom Options Available** - Custom lengths, profiles and pre-cut angled or degree-specific ends
- **Easy Fabrication** - Can be cut with any circular saws, miter saws or other PVC-cutting equipment
- **Easy Removal** - Strips cleanly without cracking or splintering
- **Cost Savings** - Less sack and patch and less grinding

Nox-Crete's Clean Line Reveal offers a durable, lightweight, and reusable solution for creating crisp, consistent rustication details in wall panels and architectural elements. Manufactured from high-impact PVC, Clean Line Reveal installs easily into formwork and maintains dimensional stability pour after pour—helping you deliver the sharp lines and clean breaks that today's designers and engineers demand.

APPLICATIONS

- Architectural wall panels requiring decorative reveals or recessed lines
- Precast concrete elements with repetitive rustication patterns
- Decorative facades, spandrels, and parapet elements
- Custom formwork designs requiring easy-to-install reveal strips
- Chamfers used to eliminate 90° angles on window and door frames
