

WEATHER-SIL & WEATHER-SIL Extreme

PENETRATING SILANE SEALERS FOR CONCRETE DRIVEWAYS AND GARAGE FLOORS

WHY SEAL?

Winter is destructive to concrete and worse still in regions where frequent freeze/thaw cycles are common. If water penetrates the concrete's surface and then changes to ice, the result can be surface scaling.

Additionally, corrosive deicing road salts cause untreated surfaces to suffer surface delamination, spalling and scaling.

Long-Term, Protection for your Concrete Surfaces!

-  Protects concrete driveways and garage floors from the damaging effects of freeze/thaw and deicing/road salt exposure
-  Prevents concrete surface scaling, spalling and delamination
-  Keeps concrete driveways and garage floors looking brand new
-  Substantially extends the serviceable life of all concrete driveway and garage floor surfaces
-  Allows treated surfaces to breathe naturally
-  Colorless and non-yellowing – will not change the natural appearance of concrete
-  Green Engineered® water-based product
