

chemical solutions to concrete problems

Nox-Crete is committed to providing high-performance concrete release agents that meet the stringent requirements of the **Build America, Buy America (BABA) Act**. Our BABA-compliant products are manufactured domestically with sourced materials that equal more than 55%, ensuring compliance with federal infrastructure projects while maintaining superior performance for clean, consistent concrete surfaces. Whether you're working on tilt-up, precast, or forming applications, our compliant solutions deliver exceptional results while supporting American manufacturing and construction.
