

Clean Line Reveal

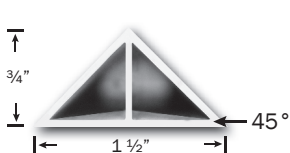

nox-crete®

chemical solutions to concrete problems

REVEALING THE ANSWER TO RUSTICATION STRIPS

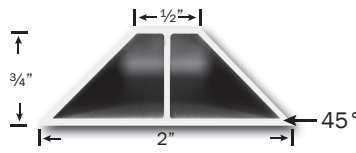

Nox-Crete offers a standard and custom extruded high density PVC reveal for precast concrete producers.

AVAILABLE PROFILES

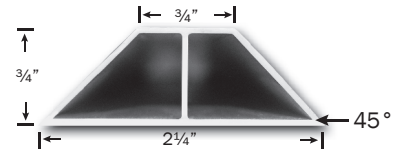

CLR 1

400 ft./box

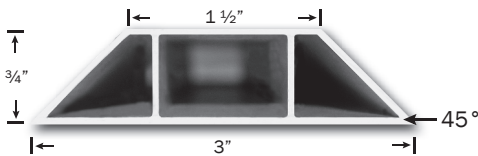

CLR 2

400 ft./box

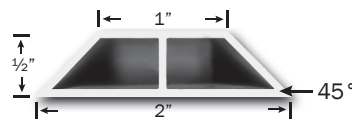

CLR 3

400 ft./box

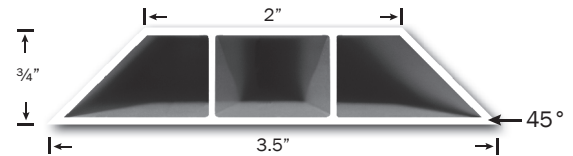

CLR 4

240 ft./box

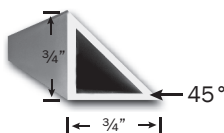

CLR 5

400 ft./box

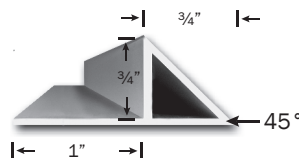

CLR 6

200 ft./box

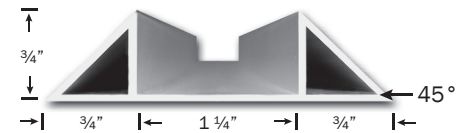

CLR 10

800 ft./box

CLR 11

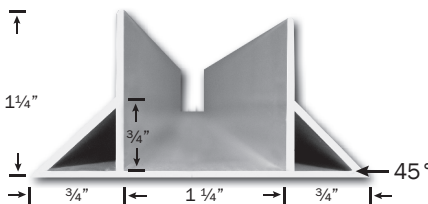

384 ft./box

CLR DCEL 3/4" Double Chamfer

(fits 1 1/4" engineered lumber)

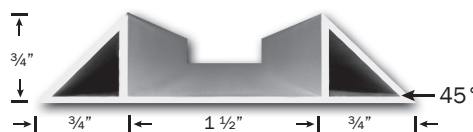

200 ft./box

CLR HDCEL 3/4" High Double Chamfer

(fits 1 1/4" engineered lumber)

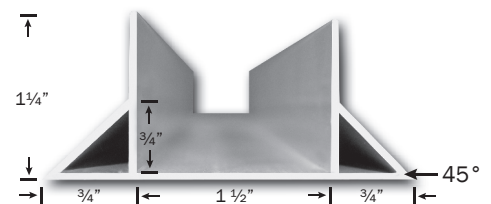

200 ft./box

CLR DCDL 3/4" Double Chamfer

(fits 1 1/2" dimensional lumber)

200 ft./box

CLR HDCDL 3/4" High Double Chamfer

(fits 1 1/2" dimensional lumber)

200 ft./box

With Nox-Crete's Clean Line Reveal Strips, you can create design details in Precast Concrete Structures like never before.

Here are some advantages to using Clean Line Reveal Strips.

- **Lightweight & Durable** - Are a fraction of the weight of wood, but very durable and largely unaffected by climatic changes.
- **Easy Installation/Fastening** - Can be installed with caulk-type adhesive or spray adhesive.
- **Uniform Finish** - Clean release leaves an incredibly smooth and uniform finish unlike wood.
- **Eliminates Retardation** - Wood reveals contain sugars that can leach from the wood and cause retardation and discoloration of the concrete. Clean Line Reveal Strips eliminate this concern.
- **Easy Fabrication** - Reveals can be cut with any circular/miter saw.
- **Easy Removal**
- **Cost Savings**
- **Clean Release**
- **Reusable**
